Luff Industries’ patented polymer endcap design offers the ultimate in strength, durability and sealing performance.

**Full 2 Year Warranty**

- Available in 5” & 6” diameters
- Entire shell is dipped before assembly to prevent corrosion from inside
- Idlers meet all CEMA standard dimensions
- Reinforced frames with flat bar running the length of the angle iron and gussets on end plates is standard on CEMA D Impact Idlers
- Very low roller runout (TIR)

Polymer endcaps provide an improved sealing arrangement, protecting the bearing from various environmental contaminants including dust and moisture.

**High Moisture Seal Available**

Polymer endcaps provide an improved sealing arrangement, protecting the bearing from various environmental contaminants including dust and moisture.

**Conveying Performance**
